Dear General Manager

I would just like to register my support of the strategic plan to install a branch library at Bowraville. This will be great for people who have limited transport options to get into the branches at Macksville and Nambucca. It will be great for the older residents who need large print books and also the nought to five year olds who need picture books. I think a disused shop would be better than a relocatable vehicle for the needs of Bowraville, we can have a place to put returned library books down a shute, then and notices about activities at the library can be placed on the windows. I just think a branch library would be fantastic for Bowraville, to cater to all the diverse needs of the community and I congratulate the Draft Library Strategy for proposing one.

Thank you
