Instructions to Applicant

Your application for approval to amend an existing sewage management facility must be accompanied by the following information and the prescribed fee:

- 1 **Plan** — your application must be accompanied by a plan, showing the location of:
 - the sewage management facility proposed to be installed or constructed on the premises; and
 - any related effluent application areas; and
 - any buildings or facilities existing on, and any environmentally sensitive areas of, any land located within 100 metres of the sewage management facility or effluent application areas.
- 2 **Specifications** — your application must be accompanied by full specifications of the sewage management facility proposed to be installed or constructed on the premises concerned.
- 3 **Site Assessment** — your application must be accompanied by details of the topography, soil composition and vegetation of any effluent application areas related to the sewage management facility.
- 4 **Geotechnical Report** — your application must be accompanied by a geotechnical report prepared by a qualified engineering/soils consultant, in accordance with the “Environment & Protection Guidelines — On-site Sewage Management for Single Households”, February 1998, “Nambucca Valley Council On-Site Sewage Management Plan 2013” and AS 1547. You should first check whether such a report was previously prepared as part of the subdivision approval of your land. If so, a further geotechnical report will not be required.
- 5 **Statement** — your application must be accompanied by a statement of:
 - the number of persons residing or probable number of persons to reside on the premises; and
 - such other factors as are relevant to the capacity of the proposed sewage management facility.
- 6 **Operation of Maintenance** — your application must be accompanied by details of:-
 - the operation and maintenance requirements for the proposed sewage management facility; and
 - the proposed operation, maintenance and servicing arrangements intended to meet those requirements; and
 - the action to be taken in the event of a breakdown in, or other interference with, its operation.
